

# NEXT LEVEL GAMING MAT

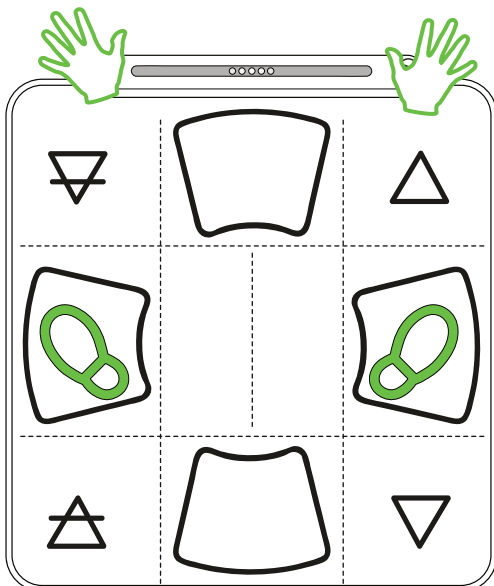

## USER MANUAL

interactive mat

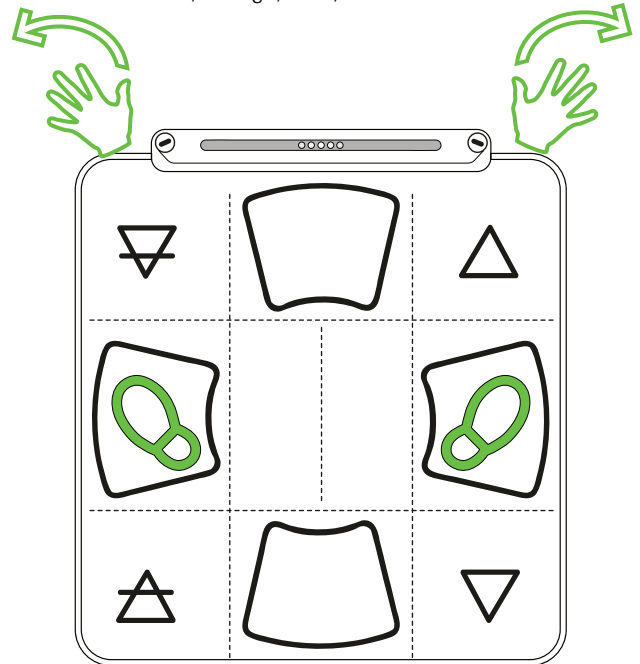

### PROGRAMMING MODE

- 1 Stand or kneel on the marked spots on the mat and cover the sensors. The lights will pulse from the center outwards. Once all the lights are on, you can remove your hands. The mat is now ready to be programmed!

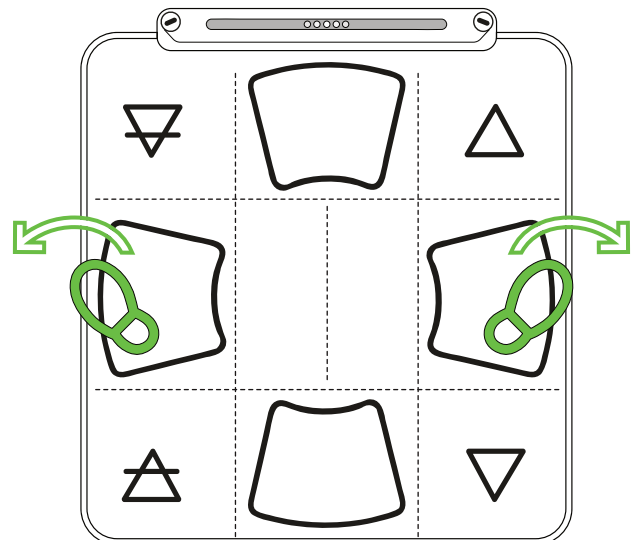

### SWITCHING PROGRAMMING MODES

- 2 To switch programming profiles, simply cover or wave your hand over the sensors. The profiles will change through white, orange, blue, and red.

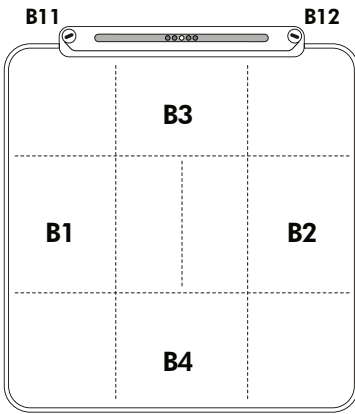

### ACTIVATE PROGRAMMING MODE

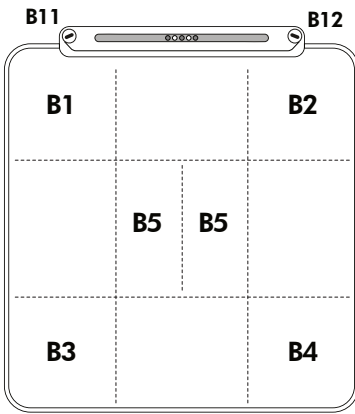

- 3 The programming profile is confirmed by stepping off the mat. Simply done!

## MAINTENANCE:

- Use the mat only on a flat surface.
- Do not stand on the panel with LED indicators, as it contains sensitive electronics.
- Store the mat flat or vertically, with the panel facing sideways.
- Clean the mat only with a microfiber cloth, which can be slightly damp.

Model / Type: YCUU1

Manufacturer: L-TEK.pl

Production data: 2024

Made in Poland
